
(a) Hybrid odometry processing
Processing time [ms]
Nominal scan period
Time since exploration start [s]
(b) Ages from sensor header stamps
Age [ms]
IMU receipt
LIDAR receipt
Estimate output
Time since exploration start [s]
(c) Scan consistency; no ground truth
Capped geometric residual [cm]
Recorded odometry
Identity pose diagnostic
Time since exploration start [s]
(d) Stationary pipeline stability
Displacement from first pose [mm]
Stationary interval time [s]
